Subject: Microsoft Settlement

Dear Sir or Mam,

I'm emailing you regarding my concern on Microsoft Corp case, I'm a student in Univ of North Texas and has been taking Microsoft way of business as my study case and has been following it's development since their flagship product release of Microsoft Windows 95 back when i was in Singapore. I feel Microsoft has abused it's position as a leading Operating System developer and manufacture. under any circumstances, Microsoft should be given a much heavier punishment than what it was suggested by Microsoft Corp themselves. I understand from financial standpoint, Microsoft could contribute to the tech industry from this case, but would "Justice" compromise with "Money" in this case?

Judge Jackson ordered a breakup in Microsoft Divisions was a very good call, i'm not a biased Microsoft so call "Hater", i'm just a student that see from the stand point of a normal human being that could see a little of the Right prospective & the Wrong prospective and i believe more people feels the same way with the controversial product Microsoft Corp released recently, Windows XP.

I hope DOJ would give the heaviest penalty to Microsoft on behalf of "Justice", after all, justice is what DOJ stands for.

Have a good day

Regards
